

Portable Fall Arrest Trailer

Possible Uses: Railroads · Transportation · Pipeline Maintenance · Building and Heavy Construction · Aviation · Mining · Public Works · Emergency Measures

The Portable Fall Arrest Trailer System combines the simplicity of a horizontal rail and trolley system with a portable structure to provide reliable fall protection where it's needed, when it's needed. The trailer-mounted system can be easily transported on the job site. The unit is self-contained and does not require a special vehicle to transport it.

Features:

- Field settable 102" by 20 ft Trailer
- 1 counterweight tray assembly measuring 34" x 64" x 6" high with anchor rings and chain assembly to secure 2.5' by 2.5' by 5' eco-block (Eco-block to be provided by customer and should have a gross weight of a minimum of 3600 lbs)
- Glide 360 rail assembly 20 ft long with two trolleys. System rating to be 2 x 900 lbs x two workers
- System to have a fixed anchor height of 23 ft measured from the ground to trolley
- System to include winching device with re-direct pulley to assist in raising the unit up in the field
- System to have a fixed offset of 8 ft
- Easy to transport
- System is collapsible for transportation.
- Initial onsite set-up and training available
- Manufactured in Canada
